#### Balance Sheet Highlights

Total cash and cash equivalents as of December 31, 2016 were \$612.7 million, compared with \$573.6 million as of September 30, 2016. We held \$572.7 million of cash and cash equivalents in accounts of the Company's subsidiaries outside of the United States.

This quarter we experienced an increase in days sales outstanding in accounts receivable ("DSO") to 50 days, compared with 43 days in the prior quarter. DSO's have increased over time and we expect this increase to continue as the mix of the Company's distributors evolves toward larger volumes of products moving through large distributors who qualify for credit terms. Enabling these customers to purchase higher volumes of products on credit terms allows them to shorten the cash conversion cycle and has helped enable the Company to significantly expand its market share while maintaining a conservative customer credit profile.

The Company has invested in inventory to reduce customer lead times, meet increasing demand and support the commensurate growth of the Company's customers. The Company is committed to optimizing inventory to correspond with end-market demand. During F2Q17, the Company continued to invest in inventory. Inventory at the end of the quarter was \$104.4 million, up \$24.6 million from F1Q17. The Company expects to hold 8 to 12 weeks of previously introduced product inventory in warehouses going forward.

#### Business Outlook

Based on recent business trends, the Company believes the demand environment in its end markets supports the following forecast for the Company's third fiscal quarter ending March 31, 2017. The following are the Company's financial performance estimates for the third quarter of fiscal 2017:

- Revenues between \$210 million and \$220 million
- GAAP diluted EPS of \$0.72 - \$0.78
- Non-GAAP diluted EPS of \$0.73 - \$0.79

**About our Non-GAAP Net Income and Adjustments**

**Use of Non-GAAP Financial Information**

To supplement our condensed consolidated financial results prepared under generally accepted accounting principles, or GAAP, we use non-GAAP measures of net income and earnings per diluted share that are GAAP net income and GAAP earnings per diluted share adjusted to exclude certain costs, expenses and gains/losses.

We believe that the presentation of non-GAAP net income and non-GAAP earnings per diluted share provides important supplemental information regarding non-cash expenses, significant items that we believe are important to understanding our financial, and business trends relating to our financial condition and results of operations. Non-GAAP net income and non-GAAP earnings per diluted share are among the primary indicators used by management as a basis for planning and forecasting future periods and by management and our board of directors to determine whether our operating performance has met specified targets and thresholds. Management uses non-GAAP net income and non-GAAP earnings per diluted share when evaluating operating performance because it believes that the exclusion of the items described below, for which the amounts or timing may vary significantly depending upon the Company's activities and other factors, facilitates comparability of the Company's operating performance from period to period. We have chosen to provide this information to investors so they can analyze our operating results in the same way that management does and use this information in their assessment of our business and the valuation of our Company.

**Use and Economic Substance of Non-GAAP Financial Measures used by Ubiquiti Networks**

We compute non-GAAP net income and non-GAAP earnings per diluted share by adjusting GAAP net income and GAAP earnings per diluted share to remove the impact of certain adjustments and the tax effect of those adjustments. Items excluded from net income are:

- Stock-based compensation expense
- Business e-mail compromise ("BEC") fraud loss/(recovery)
- Implementation of overhead capitalization

- Adoption of ASU 2016-09 Improvements to Employee Share-Based Payment Accounting
- Tax effect of non-GAAP adjustments, applying the principles of ASC 740

### **Usefulness of Non-GAAP Financial Information to Investors**

These non-GAAP measures are not in accordance with, or an alternative to, GAAP and may be materially different from other non-GAAP measures, including similarly titled non-GAAP measures used by other companies. The presentation of this additional information should not be considered in isolation from, as a substitute for, or superior to, net income or earnings per diluted share prepared in accordance with GAAP. Non-GAAP financial measures have limitations in that they do not reflect certain items that may have a material impact upon our reported financial results. We expect to continue to incur expenses of a nature similar to the non-GAAP adjustments described above, and exclusion of these items from our non-GAAP net income and non-GAAP earnings per diluted share should not be construed as an inference that these costs are unusual, infrequent or non-recurring.

For more information on the non-GAAP adjustments, please see the table captioned "Reconciliation of GAAP Net Income to Non-GAAP Net Income" included in this press release.
