Balance Sheet Highlights

Total cash and cash equivalents as of March 31, 2015 were \$451.2 million, compared with \$388.6 million as of December 31, 2014. The increase in cash and cash equivalents was primarily as a result of cash provided by operating activities of \$36.7 million for the quarter and net proceeds from a new debt facility. We believe that our cash position will allow us to make investments that will continue to enhance our competitive position and product portfolio.

This quarter we saw days sales outstanding in accounts receivable ("DSO") of 43 days, compared with 44 days in the prior quarter, and 30 days in the third quarter of fiscal 2014.

About our Non-GAAP Net Income and Adjustments

Use of Non-GAAP Financial Information

To supplement our condensed consolidated financial results prepared under generally accepted accounting principles, or GAAP, we use non-GAAP measures of net income and earnings per diluted share that are GAAP net income and GAAP earnings per diluted share adjusted to exclude certain costs, expenses and gains.

We believe that the presentation of non-GAAP net income and non-GAAP earnings per diluted share provides important supplemental information regarding non-cash expenses, significant items that we believe are important to understanding our financial, and business trends relating to our financial condition and results of operations. Non-GAAP net income and non-GAAP earnings per diluted share are among the primary indicators used by management as a basis for planning and forecasting future periods and by management and our board of directors to determine whether our operating performance has met specified targets and thresholds. Management uses non-GAAP net income and non-GAAP earnings per diluted share when evaluating operating performance because it believes that the exclusion of the items described below, for which the amounts or timing may vary significantly depending upon the Company's activities and other factors, facilitates comparability of the Company's operating performance from period to period. We have chosen to provide this information to investors so they can analyze our operating results in the same way that management does and use this information in their assessment of our business and the valuation of our Company.

Use and Economic Substance of Non-GAAP Financial Measures used by Ubiquiti Networks

We compute non-GAAP net income and non-GAAP diluted earnings per share by adjusting GAAP net income and GAAP earnings per diluted share to remove the impact of certain adjustments and the tax effect of those adjustments. Items excluded from net income are:

- Stock-based compensation expense
- Reserve against vendor deposits relating to a purchase commitment termination fee
- Gain on reversal of charge for an export compliance matter
- Tax effect of non-GAAP adjustments, applying the principles of ASC 740

Usefulness of Non-GAAP Financial Information to Investors

These non-GAAP measures are not in accordance with, or an alternative to, GAAP and may be materially different from other non-GAAP measures, including similarly titled non-GAAP measures used by other companies. The presentation of this additional information should not be considered in isolation from, as a substitute for, or superior to, net income or earnings per diluted share prepared in accordance with GAAP. Non-GAAP financial measures have limitations in that they do not reflect certain items that may have a material impact upon our reported financial results. We expect to continue to incur expenses of a nature similar to the non-GAAP adjustments described above, and exclusion of these items from our non-GAAP net income and non-GAAP earnings per diluted share should not be construed as an inference that these costs are unusual, infrequent or non-recurring.

For more information on the non-GAAP adjustments, please see the table captioned "Reconciliation of GAAP Net Income to Non-GAAP Net Income" included in this press release.
