On a full year basis, fiscal 2019 GAAP gross profit was \$537.6 million. GAAP gross margin of 46.3% increased 2.7% versus the comparable prior year period GAAP gross margin of 43.6%.

The increases in gross profit percentage for the full year fiscal 2019 as compared to the comparable

prior-year period was driven by favorable mix of products sold, lower inventory write-offs offset, in party by higher tariff-related costs and higher indirect expenses.

# Research and Development

During the fourth quarter fiscal 2019, research and development (R&D) expenses were \$22.5 million. This reflects an increase as compared to the R&D expenses of \$19.5 million in the comparable prior year period and R&D expenses of \$21.3 million in the prior quarter.

On a full year basis, fiscal 2019 R&D expenses were \$82.1 million. This reflects an increase as compared to the R&D expense of \$74.3 million in the comparable prior year period.

Increased costs in both the fourth quarter fiscal 2019 and full year fiscal 2019, as compared to the comparable prior-year periods, were driven by higher employee-related expenses and other development activities.

## Sales, General and Administrative

The Company's sales, general and administrative (SG&A) expenses for the fourth quarter fiscal 2019 were \$9.5 million. This reflects a decrease as compared to the SG&A expenses of \$12.9 million in the comparable prior year period and a slight increase as compared to the SG&A expenses of \$9.4 million in the prior quarter. The decrease in fourth quarter fiscal 2019 as compared to the comparable prior year period was primarily related to lower professional fees.

On a full year basis, fiscal 2019 SG&A expense was \$43.2 million reflecting a slight increase as compared to the SG&A expense of \$43.1 million for fiscal 2018. Fiscal 2019 SG&A expenses were consistent with fiscal 2018 primarily due to higher employee-related costs and web store operating costs and offset, in part, by lower professional fees, marketing expense and stock-based compensation.

## Net Income and Earnings Per Share

During the fourth quarter fiscal 2019, GAAP net income was \$70.9 million and non-GAAP net income was \$83.6 million. This reflects an increase in non-GAAP net income from the comparable prior year period by 11.8%, primarily driven by a 6.3% increase in revenues and a higher gross margin.

During the fourth quarter fiscal 2019, GAAP earnings per diluted share was \$1.01 and non-GAAP earnings per diluted share was \$1.19. This reflects a 7.4% increase in GAAP earnings per share and a 17.8% increase in non-GAAP diluted earnings per share from the comparable prior-year period. Both GAAP and non-GAAP earnings per share benefited from higher net income and a reduction in GAAP and non-GAAP diluted shares outstanding.

## **Balance Sheet Items**

## Cash and Investments

Total cash and cash equivalents were \$238.1 million as of June 30, 2019 compared with \$666.7 million as of June 30, 2018. In addition, as of June 30, 2019, we held \$101.5 million in available-for-sale securities.

# **DSOs**

This quarter the Company experienced a decline in days' sales outstanding (DSOs) in accounts receivable to 50 days, as compared with 51 days in the third quarter fiscal 2019.

#### Inventory

Finished goods inventory as of June 30, 2019 was \$260.9 million. This represents a decrease of \$15.8 million from March 31, 2019 and an increase of \$164.2 million from June 30, 2018. We expect to manage our finished goods inventory to meet demand, reduce lead times and secure supply.

# **Cash Flow Statement Items**

The Company's net cash flow from operations for the fiscal year ended June 30, 2019 was \$259.3 million, compared with net cash flow from operations of \$332.05 for the comparable prior year period. The \$72.8 million decrease in operating cash flow during fiscal 2019 as compared with the comparable prior year period was primarily driven by the net impact of increased inventory and the corresponding payables, partially offset by higher net income. For the fiscal year ended June 30, 2019, the Company used \$157.6 million of cash for investing activities, which was primarily related to net investments in available-for-sale securities of \$100.9 million and also used \$530.2 million of cash for financing activities, which was driven by \$468.2 million in stock repurchases, and \$71.4 million in cash dividend payments and offset, in part, by draws of \$35.0 million under our revolving facility.

(1) The \$12.3 million non-GAAP adjustment in the fourth quarter fiscal 2019 related to Tax Regulation changes represents our estimate of the impact of the Final GILTI Regulations on our earnings during the first nine months of fiscal 2019. This fourth quarter adjustment is not included in the full year non-GAAP results because the fiscal 2019 results properly reflect the full year impact of the Final GILTI Regulations and we expect the Final GILTI Regulations to impact us in the future. As a result, the sum of the quarterly non-GAAP results will not equal the full year non-GAAP results.

#### **Use of Non-GAAP Financial Information**

To supplement our condensed consolidated financial results prepared under generally accepted accounting principles, or GAAP, we use non-GAAP measures of net income and earnings per diluted share that are adjusted to exclude certain costs, expenses and gains such as stock-based compensation expense, net tax benefits related to equity awards exercises and vesting, unusual litigation settlements, SEC related matters, Tax Reform, Tax Regulation changes and the tax effects of these non-GAAP adjustments.

Reconciliations of the adjustments to GAAP results for the periods presented are provided above. In addition, an explanation of the ways in which management uses non-GAAP financial information to evaluate its business, the substance behind management's decision to use this non-GAAP financial information, material limitations associated with the use of non-GAAP financial information, the manner in which management compensates for those limitations, and the substantive reasons management believes that this non-GAAP financial information provides useful information to investors is included under the paragraphs below.

# **Usefulness of Non-GAAP Financial Information to Investors**

We believe that the presentation of non-GAAP net income and non-GAAP earnings per diluted share provides important supplemental information regarding non-cash expenses, significant items that we believe are important to understanding our financial, and business trends relating to our financial condition and results of operations. Non-GAAP net income and non-GAAP earnings per diluted share are among the primary indicators used by management as a basis for planning and forecasting future periods and by management and our board of directors to determine whether our operating performance has met specified targets and thresholds. Management uses non-GAAP net income and non-GAAP earnings per diluted share when evaluating operating performance because it believes that the exclusion of the items described below, for which the amounts or timing may vary significantly depending upon the Company's activities and other factors, facilitates comparability of the Company's operating performance from period to period. We have chosen to provide this information to investors so they can analyze our operating results in the same way that management does and use this information in their assessment of our business and the valuation of our Company.

# About our Non-GAAP Net Income and Non-GAAP Earnings per Diluted Share

We compute non-GAAP net income and non-GAAP earnings per diluted share by adjusting GAAP net income and GAAP earnings per diluted share to remove the impact of certain adjustments and the tax effect of those adjustments. Items excluded from net income are:

- Stock-based compensation expense
- Net Tax Benefits related to Equity Awards Exercises and Vesting
- Litigation settlement
- Tax Reform and Tax Regulation changes
- · SEC related matters
- Tax effect of non-GAAP adjustments, applying the principles of ASC 740

These non-GAAP measures are not in accordance with, or an alternative to, GAAP and may be materially different from other non-GAAP measures, including similarly titled non-GAAP measures used by other companies. The presentation of this additional information should not be considered in isolation from, as a substitute for, or superior to, net income or earnings per diluted share prepared in accordance with GAAP. Non-GAAP financial measures have limitations in that they do not reflect certain items that may have a material impact upon our reported financial results.

For more information on the non-GAAP adjustments, please see the table captioned "Reconciliation of GAAP Net Income to non-GAAP Net Income" included in this press release.
